YOSIA PARADE BANUA SINAGA

+62 821-6055-8282 | yosiaparadesinaga@gmail.com | linkedin.com/in/yosiasinaga | yombia.github.io/Portofolio
Bandung, Indonesia

Informatics graduate from Telkom University with practical experience in full-stack development, data analysis, and UI/UX design. Comfortable owning work from backend logic to the user-facing side, and used to shipping projects on deadline while working closely with a team.

Work Experience

CV Borisma Karya — Medan, Indonesia Jan 2025 – Jun 2025
Data Analyst
Borisma Karya is a consulting firm specializing in innovative architectural design and high-standard construction services.

- Managed the full data workflow across 6 to 10 client projects, spanning project tracking, client and sales figures, and internal operations.
- Built 10+ dashboards and reports in Excel, SQL, Python (pandas), and Power BI to help the team read operational data and make decisions faster.
- Worked directly with project managers and internal staff to turn their questions into clear, structured analysis they could act on.

Telkom Indonesia — Bandung, Indonesia Jun 2025 – Aug 2025
Software Engineer Intern
The largest state-owned digital telecommunications company in Indonesia, providing information technology, communication, and network services.

- Built a self-hosted internal tools platform (Lowcoder, PostgreSQL, Docker) for the Digital Business Technology division, so Product Owners no longer needed direct database access. This made daily operations safer and easier.
- Set up a 3-tier access control system (Admin, Product Owner, Member) that checks permissions both on the interface and at the SQL query level, so unauthorized changes are blocked even if someone calls the API directly.
- Added SSO-based role detection to assign permissions in real time, and moved the setup from a single all-in-one Docker image to a proper multi-container architecture.

Projects

AI Course Recommendation System Laravel · React · LLM API · Tailwind 2025
Computing Project course, with the Faculty of Electrical Engineering as the real client.

- Built a web app that suggests electives to students based on their interests, grades, and past courses. A short quiz feeds into their academic data, and the combined profile is sent to an LLM API to generate the recommendations.
- Role: Full-Stack Developer. Built the Laravel API and the React and Tailwind frontend, and worked with a teammate on the AI integration. Team of 2 to 3.

InnoRide — Vehicle Rental Platform Flutter · Laravel · Sanctum · MySQL 2025
Team project for the Platform-Based Application Development course.

- Built a mobile vehicle rental app with an admin dashboard, covering vehicle browsing, booking with dynamic pricing, promo codes, reviews, and inventory management for admins.
- Role: UI/UX Designer, plus Frontend (Flutter) and Backend (Laravel). Built the API with Sanctum auth, the CRUD endpoints, and the booking logic. Team of 3.

PILLORA — Medicine Reminder Mobile App React Native · Laravel · REST API 2025
Cross-platform mobile app for medication reminders and adherence tracking.

- Reached an 85% adherence rate with 50 pilot users over two weeks, and kept notification delay under 3 seconds.
- Rated 4.3 out of 5 by 100 beta testers. Role: Full-Stack Developer.

LuxeUp — Java OOP E-Commerce Simulation Java · JSP · JDBC 2024
Group project for the Object-Oriented Programming course.

- Built an e-commerce simulation to practice core OOP ideas (encapsulation, inheritance, polymorphism, abstraction) using a modular class design (Product, Customer, Cart, Order).
- Role: Frontend Developer (JSP). Built the product catalog, cart, and checkout pages. Team of 6.

Education

Universitas Telkom — Bandung, Indonesia Sep 2022 – Nov 2026
Bachelor of Informatics — GPA 3.08 / 4.00

- Active in student organizations, which sharpened my communication and leadership across teams.
- Joined competitions that lined up with my interests and technical strengths.

Organization Experience

Keluarga Besar Sumatera Utara (KBSU) — Bandung Dec 2024 – Dec 2025
Head of Human Resource Development (Kepala Bidang PSDM)
A regional student organization for students from North Sumatra, focused on leadership, soft skills, and cultural activities through social, academic, and arts programs.

- Kept the division's discipline and performance on track and made sure everyone followed the organization's SOPs.
- Oversaw all of the division's work programs and made sure each one ran on schedule and hit its target.
- Ran the people-development side, including skill-upgrading and bonding sessions, which kept the members solid and engaged through the term.

Skills

Programming Languages & Frameworks: PHP, Laravel, Java, Golang, JavaScript, React.js, React Native, Flutter, Dart, Kotlin, Python, SQL, HTML/CSS, Tailwind CSS, Laravel Sanctum, JSP, JDBC.

Databases: PostgreSQL, MySQL, MongoDB.

Tools & Platforms: Git, GitHub, Docker, VS Code, Android Studio, NetBeans, Figma, Postman, Thunder Client, Vite, Power BI, LaTeX (IEEE Standards), Microsoft Office Suite.

Soft Skills & Languages: Leadership and team coordination, cross-functional collaboration, analytical and problem-solving, effective communication, time management, public speaking, stakeholder management. Languages: Indonesian (native), English (professional proficiency).
